CHN's telephone discussion with Audrey Bell - 6/9/93 - 6:40 P.M. (Pittsburgh time).

3 to 5 fragments of metal from Connally's wrist were removed by the surgeon - "at least 4".

These were placed in a 1 oz. glass medicine cup - approximately 1" diameter bottom. These fragments covered much of the bottom of the cup, "at least 1/2 to 2/3 of the bottom surface".

AB (who was the OR Supervisor) took these from the scrub nurse's tray. AB gave these directly to two men - FBI or Secret Service. She knows they were not local policemen.

AB got a signed receipt - original copy sent down to Administration - carbon copy given to FBI.

The next day, AB spent one hour in Administrator's office going over handling of fragments - i.e., tracing order of these transfers - AB had taken fragments from the cup and placed them into a "foreign object" envelope (this was the same procedure and the same kind of envelope that AB and other nurses routinely used on many occasions when bullets and other foreign objects were removed from bodies in cases where such objects were to be turned over to the local Medical Examiner) - then envelope was given to FBI (or Secret Service). She does not remember the name of the man to whom she gave the envelope.

Oswald's Shooting -

Dr. Shires gave Oswald bullet to AB on Sunday - witnessed by Dr. Shaw - given to local police (not FBI or SS).

SHE WAS NEVER CALLED TO TESTIFY BEFORE WC.

AB sounds like a very sharp person, clearly in total control of her mental faculties. She was pleasant and easy to talk to. She had no hesitation in conveying these recollections to me.
